**LOCATION: KOOTENAI'S HEALTH RESOURCE CENTER  
(see map)**

The Advanced Trauma Life Support® (ATLS®) program can teach you a systematic, concise approach to the care of a trauma patient. ATLS was developed by the American College of Surgeons (ACS) Committee on Trauma (COT) and will provide you with a safe and reliable method for immediate management of injured patients. The course teaches you how to assess a patient's condition, resuscitate and stabilize him or her, and determine if his or her needs exceed a facility's capacity. It also covers how to arrange for a patient's inter-hospital transfer and assure that optimal care is provided throughout the process. If you do not treat trauma patients frequently, an ATLS course provides an easy method to remember for evaluation and treatment of a trauma victim.

#### OBJECTIVES:

- Assess the patient's condition rapidly and accurately
- Resuscitate and stabilize the patient according to priority
- Determine if the patient's needs exceed a facility's capabilities
- Arrange appropriately for the patient's definitive care
- Ensure that optimal care is provided
